AERIA Luxury Interiors Delivers Yet Another VVIP Completions Program, Months Ahead of Schedule

San Antonio, TX, USA, 30 September 2019 – AERIA Luxury Interiors (AERIA) is pleased to announce that it has successfully added a third custom VVIP completions program to its track record when it delivered a B737-700 to an undisclosed head-of-state customer earlier this month. The program was delivered ahead of schedule.

AERIA had begun work on the business jet when the aircraft arrived at its San Antonio facility in the second quarter of 2018. Using only premium materials, the interior was constructed using the highest quality fabrics and exotic veneers to create a spacious and comfortable atmosphere fit for royalty. The interior configuration includes a statement entryway, private quarters with an elegant VIP bedroom and ensuite lavatory, including a bidet and shower. Office quarters showcase largely-scaled furnishings including a custom handcrafted desk and an ultra-plush, fully certified custom-made 6 zone massage seat.

Staff and club style seating make up the aft section of the aircraft and features the brand new Boeing Sky Interior, offering more head room and further illustrates the expansive space of the open layout. The private jet can comfortably accommodate 26 passengers, boasting a lovely array of clean crisp hues paired with chic accents and gold plated detailing, most notably within methodically placed medallions throughout the cabin and intricate lattice detailing used to elevate the stately design.

The narrow-body aircraft also offers the latest connectivity capabilities and passenger convenience through a uniquely innovative single SSID Wifi network enabling the principle client one login to access internet, e-mail, cabin controls, stream video on-demand and Airshow Mobile App, all built into one wireless network. In addition, the aircraft was completed with the HD Airshow by Collins Aerospace and HD monitors throughout as well as the Direct

View Camera System with a custom display monitor located in the galley offering the capability for additional viewing on the CMS touchscreen control panels, further offering clients the latest technology on the market.

Ron Soret, Vice President/General Manager of AERIA, said, “We are happy to reach our latest milestone since AERIA’s inception in 2012 with the early delivery of our third completions program. Our commitment to continuous improvement and product excellence has resulted in a successful VIP program and is proving to set a new benchmark for customer expectations with each delivery. We look ahead to more exciting VIP completions projects in the near future that can further demonstrate AERIA’s capability in delivering each and every project on time or ahead of schedule without compromising quality or craftsmanship.”

Specializing in the completion and refurbishment of both Airbus and Boeing jets, AERIA is located in San Antonio, Texas – the birthplace of large aircraft VIP completions – where it has access to skilled craftsmen, a pool of highly trained engineering talent as well as a cluster of supporting businesses in the region. The facility includes in-house backshops including a cabinetry, upholstery and sheetmetal shop as well as an advance design showroom that showcases its wide array of solutions in VIP completion.

Visit AERIA at booth N4831 at NBAA from 22 to 24 October to find out more about its full suite of services for maintenance and VIP completions, including interior design, completion, maintenance, product development and integration.

ST Engineering is a global technology, defense and engineering group specializing in the aerospace, electronics, land systems and marine sectors. The Group employs about 22,000 people across offices in Asia, the Americas, Europe and the Middle East, serving customers in the defense, government and commercial segments in more than 100 countries. With more than 500 smart city projects across 70 cities in its track record, the Group continues to help transform cities through its suite of Smart Mobility, Smart Security and Smart Environment solutions.

Headquartered in Singapore, ST Engineering reported revenue of \$6.7b in FY2018 and it ranks among the largest companies listed on the Singapore Exchange. It is a component stock of the FTSE Straits Times Index, MSCI Singapore, SGX ESG Transparency Index and SGX ESG Leaders Index.

The Aerospace sector provides integrated aerospace services and solutions through a global network of facilities and affiliates in the Americas, Asia Pacific and Europe, supporting a broad customer base that comprises leading airlines, airfreight operators and armed forces. Its wide spectrum of maintenance and engineering solutions include airframe, engine and component maintenance, repair and overhaul; engineering design and technical services; as well as aviation materials and asset management services. The sector also has original equipment manufacturing capabilities and holds proprietary designs in products such as aircraft seats. For more information, please visit www.stengg.com.
